

Who was there:

Sticky notes:

Syd left.

Youth need to be involved in planning/processes because the tend to be left out of conversations.

"Shows the intergenerational thinking"

Mobilize rangatahi leaders into governance because

We need better representation. e.g. more Chloe Swarbrick.

Youth need better communication from government because they are not educated <sup>enough</sup> or well informed.

Encourage Public-Private partnerships in education because it ~~improves~~ creates better opportunities to ~~use~~ our youth

Stock-take of Maori & Pacific people's wealth to NZ society beyond the maori deficit lenses.

Refined ideas:

Refined problem statement(s):

Youth voice is missing.

This matters because it takes away the generational perspective in policy.

Education on government is lacking.

Creating partnership with communities is important because at the moment some govt department have a transactional relationship

# We need an engagement performance framework because eng./govt is ad hoc & varied in quality

NEEDS More People To Be INVOLVED  
OSP  
IE Marae  
CHURCHIE'S P.I

Gender equality is important because

Currently we have a hugely unequal gender representation at the decision making table  
- women } voices are marginalized  
- youth }  
- children's }

value of Cultural diversity is important because NZ is a multicultural society. How do you value diversity or create a platform for diverse voices to come through

We need better representation of Maori in decision-making/government because there tends to lack exercise of Treaty Partnership.

Government data needs to ensure segregated data is available & accessible because current ethnic divisions (Maori, Pasifika, Asian) are limited in their usefulness.

# Partnerships with groups that have reach into diverse communities because engagement is not representative

Diversity representation of women of colour onto government & local boards because currently there are little representation.

More diversity & inclusion  
- Provide the platform to access govt -

Inclusion strategies when appointing leadership/governance roles, because decision making are being made by same set of people.

Refined ideas: and giving value to

Creating spaces for diverse community voices to come through

values-based Create/standards for all-of-Govt for public engagement to ensure diverse/affected voices are heard  
↓ report it publicly.

Value our wealth of communities - how it can solve the problems

Refined problem statements(s)

Gender inclusion

Migrant/refugee inclusion

Relationship w. Gov't is transactional - needs to move to partnership

# Who was there:

Jenny Goff.

# Sticky notes:

# all data should be made open & accessible <sup>wherever it can be</sup> used by business & NGOs/communities

Population agencies (TPK, MPP, OEC) need to share data and ensure open, available & accessible because NZ society is increasingly mixed, diverse and heterogeneous

Govt data needs to be accessible because currently the public lacks the knowledge on "how-to" do this easily.

We should be using technology to <sup>improve the performance of</sup> landlords & rental housing because there is no transparency for renters

# we need a public register of landlords ~~as~~ because they can access all info about renters but not the other way

Govt data needs to define processes for holding govt accounts in socio-cultural terms because the current measures of success are inadequate

"I want to track how my personal data is stored/shared/used across govt."

Shared information across govt, + NGO is important & <sup>should be</sup> transparent.

# make diaries of politicians open to view because the public should know who they meet with

Govt needs to be transparent about what has failed because tax-payers are paying for the same mistakes

# Refined problem statements

Access to <sup>data about</sup> what is happening in Gov't

Helping civil society engage with good data to inform decision-making.

Data protection + Sovereignty

Joining-up across gov't.

Who was there:

Mantini joined

Sticky notes:

Generational  
Success planning  
Creating new  
jobs, bees  
there is not  
plan in place  
that's looking  
at this.

Needs more  
worker  
Participation

mana Wahine  
women in work,  
generational  
inclusion of  
young women start.  
for specific regions  
bees 60% to  
Maori women are  
occupying Wiri Piri  
Pacific 13%, nos  
ribins.

Trades training  
for Maori &  
Pacific communities  
to facilitate bees  
currently ~~is~~ held  
by TEO's. Jwi  
Pacific community  
funded.

Income  
Living wage is  
important  
because  
currently wages  
don't match  
the living  
standard

Refined ideas:

Refined problem statements:  
Openness & transparency  
around economic  
strategy e.g. what sorts of  
jobs will people have in  
future? what resources  
need to go into that?

Who was there:

# everyone  
Should be educated  
in civics  
because people  
don't know how  
many ways it (govt)  
impacts their  
lives.

Sticky notes:

Encouraging to  
upskill/educate  
should be one  
of the top priorities  
Because  
better education  
normally relates  
to better life

All types of  
Education should  
be accessible  
because <sup>NOT</sup>  
Not everyone is  
willing/ready for  
Public system

Refined ideas:

Ambassadors/champions

Refined problem statements.

On-going education around  
civics/engagement with govt  
& constitutional base/legitimacy  
of govt.  
Education to sustain the  
individual, the community  
into the future.

Waste recycling  
plant is  
important  
because currently  
we have a  
plastic fantastic  
(not) space!  
Think Green, clean  
NZ  
What does this look like!

Public  
Transportation is  
important  
we need to plan  
to cater for rising  
population and need  
adequate infrastructure  
to ~~also~~ cater for  
It - road  
- transportation  
- housing  
- health zone

Environmental  
sustainability  
is important  
because currently  
in the name of  
Economic growth  
we compromise  
our environment

Green Business  
re-cycle &  
environment,  
waste  
management  
plan for future  
because there is  
not clear  
plan in place.

Refined Ideas

Opportunities

Transparency of environmental  
decision-making

Transp of corporate lobbying

Whole cost

---

Better communication for  
engagements like this.

 Peter  
 Jaackie  
 Yawa

# greater use of citizen tech because we need to measure impact of community participation towards environmental goals

# We need online voting because voter participation is too low.

# We need to find ways to harness collective brainpower because govts. don't have all the answers

# We need to have large scale conversations using crowd technologies to build consensus because too few are participating

govt. needs to share power & control

Digital accessibility is important because currently there is a digital divide in the community

# Use technologies like trip advisor to rate interaction with govt. agencies because no accountability

## Refined ideas

Digital accessibility is important but.

Also need to empower intermediaries to ensure champions diversity

Having the conversation in the language people understand.  
 Ensuring people understand the issues

## Refined problem statements

How do we enable large scale conversations including digital?

# Use of tools like Pol.is ~~to enable~~ public because conversations should be open & transparent

I want my children to be digital-able-access to & included in what govt decisions are about!

Govt policy-makers need to engage w/ communities as key stakeholders because when developing briefings, memos, policy or legislation there is little evidence of lived experience.

"I want my P.I. values reflected in policy development!"

~~that is~~ Nationalism what does this mean because at the moment NZ seems very divided. what does it mean to be a NZer in 2019? Value to Diversity?

Why will open govt. matter to me & my family?

WIIFM ??

We need transformative policies + plans that are values based approach because current plans + policies don't mean anything to us?

Refined ideas

Refined ideas problems

- Demographics ~ rate of change
- Plan for future.
- How to consult / policy development.
